EDUCATION

Thai Nguyen University of Information and Communication Technology

Information Technology

2023 - Present

GPA: 3.91/4.0

TECHNICAL SKILLS

- Languages:
 - C++ (Intermediate)
 - Python (Intermediate)
- Frontend:
 - HTML, CSS, JavaScript (Intermediate)
- Backend:
 - Flask (Intermediate)
 - REST API Development
- Database:
 - SQL Server
 - SQLite (Intermediate)
- Tools: Git, GitHub, AI (ChatGPT, Claude, OpenClaw)

ABOUT ME

I'm Trieu Van Dai, a third-year student with hands-on experience in C++, Python, and software development. Passionate about building scalable and practical applications, with experience in developing desktop and web-based systems. Strong interest in backend development and system design, with the ability to apply problem-solving skills to real-world projects.

PERSONAL EXPERIENCE

Project: Application of the DBSCAN Algorithm in Analyzing Vascular Calcification in Computed Tomography (CT) Images

Team size: 03 members

Position: Leader

Link Github: <https://github.com/DaiTrieuVan/NghienCuuKhoaHocByTVD>

Key feature:

- Automatically detect and classify vascular calcification regions in Computed Tomography (CT) images.
- Optimize DBSCAN parameters (eps and minPts) to achieve the best clustering performance.
- Evaluate the effectiveness of the model by comparing it with manual analysis and other clustering algorithms.
- Assist medical professionals in early and accurate diagnosis of atherosclerosis-related diseases, thereby improving treatment outcomes

Tech stack:

- Core language: Python
- Medical Data Parsing: pydicom
- Computer Vision (CV): opencv-python (cv2)
- Core Algorithm (Machine Learning): scikit-learn
- Matrix Processing Engine: numpy
- Graphical User Interface (GUI): PyQt6

Project: News Website With Flask

Team size: 04 members

Position: Leader

Link Github: <https://github.com/laodai12035-boop/NewsWebsiteWithFlaskByGroup4>

Key feature:

- Role-Based Access Control (RBAC) & Publishing Workflow
- Content Management
 - Article CRUD
 - Category CRUD
- Authentication & User Management
- UI/UX & Miscellaneous:

SOFT SKILLS

- Team work
- Time management
- Problem solving
- Self learning

LANGUAGE

- English: B2 (CEFR)

- Responsive Design
- Smart Data Seeding
- AI Features
 - TTS
 - Article Review

Tech stack:

- Backend: Python with the Flask Framework.
- Database: SQLite paired with Flask-SQLAlchemy (ORM)
- Frontend: Pure HTML5, CSS3 and Vanilla JavaScript.
- Template Engine: Jinja2
- Security & Auth: Flask Session management and Werkzeug for secure password hashing.

ACHIEVEMENT

- Participated in ICTU OJ CHALLENGE 2025
– LET'S CODE & CONQUER!
Thai Nguyen University of Information and Communication Technology
Ranked 20
- OLYMPIC ENGLISH
Thai Nguyen University of Information and Communication Technology
Ranked 3rd
